

Transformative Innovations Unveiled: DOME 4.0 Project Showcases Workshop

The DOME 4.0 Project is pleased to announce its forthcoming workshop, where it will unveil the **DOME 4.0 Platform** through an exciting series of **nine showcases**. Scheduled to take place on **October 16th**, this event promises to illuminate the transformative potential of the DOME 4.0 Platform across various sectors.

From polymer processing to quantum computation, the showcases will delve into diverse topics, showcasing the platform's ability to **revolutionize knowledge synthesis and data exchange** in the materials and manufacturing industries. Attendees can expect insights into structural adhesive technologies, marine air quality, and much more.

The DOME 4.0 Platform is an innovative **industrial data marketplace ecosystem** designed to enhance interoperability. Leveraging formal **ontology-based support**, it facilitates **seamless integration** of heterogeneous data, tools, and services, empowering users with comprehensive insights and solutions.

The workshop format includes a presentation of the DOME 4.0 Platform, followed by **live demonstrations**. Attendees will also have the opportunity to explore each showcase in detail, with presentations highlighting their execution on the DOME 4.0 Platform. The event will conclude with an outlook session and a chance for attendees to engage in a **Q&A session**.

Format:

Presentation of the DOME 4.0 Platform and Live Demo - **[15 min]**

Presentation of the 9 showcases and their execution on the DOME 4.0 Platform - **[9x 10 min]**

Outlook and Q&A - **[15 min]**

Interested participants are invited to register for the workshop using the provided [form](#).

Don't miss this opportunity to witness the convergence of technology and industry advancement at the DOME 4.0 Project's showcase workshop!

Event Details:

- **Date:** Wednesday 16th, 2024
- **Time:** 14:00-16:00 CET
- **Format:** Online
- **Registration:** <https://forms.office.com/r/vfRXCrb2SF>

About DOME 4.0 Project:

The DOME 4.0 Project is dedicated to advancing industrial data marketplace ecosystems through its innovative DOME 4.0 Platform. By emphasizing interoperability and leveraging formal ontology-based support, the project aims to revolutionize knowledge synthesis and data exchange across various sectors.
